

MONEY CARD — SUPER ADMIN DEMO GUIDE

Comprehensive End-to-End System Walkthrough, Architecture, Malayalam Scripts & FAQs

SUPER ADMIN SCOPE

Multi-Tenant SaaS | Offline POS Sync | Plan Overrides | Real-Time Analytics

1. Executive Overview & Multi-Tenant Architecture

Money Card is an enterprise-grade multi-tenant smart card ecosystem designed for seamless cashless operations in universities, hospital canteens, corporate parks, and multi-branch food courts. The Super Admin holds root authority across the entire platform.

Malayalam Summary / Malayalam Explanation:

Money Card ennal college-ukal, hospital-ukal, IT park-ukal ennivayile cafeteriakale poornamayi cashless aakkunna smart card system aanu. Super Admin aanu platform-inte owner. Super Admin-u keezhil palavidha cafeteriakale (Organizations) register cheyyanum, avarude collection, sales, active cards, plan renewal requests enniva live aayi monitor cheyyanum saadhikkum.

Role Level	Primary Scope & Responsibilities	Key Controls & Privileges
Super Admin	Global Platform Owner (All Cafeterias)	Platform analytics, Plan catalog, Org approvals, Override
Org Admin	Single Cafeteria Owner (Multi-Branch)	Staff assignment, card inventory, menu pricing, local rep
Branch Staff	Cashier / POS Operator	Card tap checkout, card recharge, balance inquiries, refu

2. Super Admin Modules & Core Business Logic

Module 1: Real-Time Platform Dashboard (/)

Central control room featuring Urgent Action Needed alerts, Quick Actions, Time Window filters, and 4 Synchronized KPI Cards (Cafeterias, Sales, Active Cards, Orders). Choosing a cafeteria in the single dropdown immediately synchronizes all 4 KPI boxes to that exact Organization Admin in real time.

Malayalam Explanation: Super Admin login cheyyumpol thanne urgent plan approvals kanikkum. 4 KPI card-ukalil (Cafeteria, Sales, Active Cards, Orders) motham collection live aayi kanam. Oru cafeteria select cheythal aa cafeteria-yude maathram metrics-ilekku taniye maarum.

Key Capabilities: View Cafeterias collapsible directory, Quick action routing, Scoped drill-down.

Module 2: Cafeterias / Organization Management (/organizations)

Onboard new cafeterias, allocate unique organization IDs, assign initial subscription plans, adjust card/staff quota limits, and set status to Active or Suspended based on billing and policy compliance.

Malayalam Explanation: Puthiya cafeteria-kale add cheyyuka, avarude admin email, allocated plan, card limits enniva set cheyyuka, athupole non-payment vannal suspend cheyyuka ennivakkayi upayogikkunnu.

Key Capabilities: Add Organization, Manage Quotas, Set Active/Inactive status.

Module 3: Plans & Subscriptions Management (/subscriptions & /plans)

Configure global SaaS subscription catalog (Basic, Standard, Enterprise), set price billing intervals (Monthly/Yearly), enforce branch/staff/card limits, and review/approve plan change and renewal requests submitted by Org Admins.

Malayalam Explanation: Plan-ukal create cheyyuka (Basic, Standard, Enterprise), cafeteria-kalkulla card/staff limits theerumanikkuka. Cafeteria-kal ayakkunna plan renewal/upgrade requests review cheythu approve cheyyuka.

Key Capabilities: Review & Approve requests, Status filter (Pending/Approved/Rejected), Custom Overrides.

Module 4: Platform Analytics & Client-Side PDF Engine (/analytics)

Financial aggregation of gross purchases, customer recharges, refunds, and net revenue. Includes branch performance matrices and peak demand hour curves. Offers Dual-Mode PDF export: [View PDF] in-browser blob preview & [Download PDF] native vector rendering.

Malayalam Explanation: Motham revenue, recharges, customer refunds, net revenue enniva live chart-ukalil kanam. [View PDF] vazhi browser-il thanne report preview cheyyam, [Download PDF] vazhi direct print-ready file download aakum.

Key Capabilities: Revenue metrics, Peak hour diagnostics, Zero-server-load jsPDF exports.

3. Step-by-Step Live Demo Presentation Script

Step 1: Super Admin Login

- English: Log in with super admin credentials. The system recognizes root privileges and directs straight to the platform dashboard.
- Malayalam: Super Admin login cheyyumpol direct aayi central platform dashboard-ilekku access labhikkunnu.

Step 2: Urgent Approvals Banner

- Malayalam: Analytics-il [View PDF] click cheythu in-browser preview-um, [Download PDF] vazhi direct download-um kanikkuka.

4. Expected Questions & Exception Scenarios (FAQ)

Q1: What happens if an organization exceeds its smart card limit or staff limit?

Ans (EN): The platform enforces real-time quota guardrails. When limit is hit, backend blocks new card issuance with 403 PLAN_LIMIT_EXCEEDED and prompts the Org Admin to request an upgrade.

Ans (ML): Card limit kazhinjal puthiya card issue cheyyan system sammathikilla. Super Admin-u plan upgrade request ayakkendi varum.

Q2: How does the system handle offline POS transactions if internet fails in cafeteria?

Ans (EN): Cashier POS terminals use an encrypted localized transaction buffer with session tokens. When internet reconnects, all buffered transactions sync and reconcile automatically.

Ans (ML): Internet poyalum POS machine-il offline aayi bill cheyyam. Internet thirike varumpol automatic aayi central server-il sync aakum.

Q3: Can one cafeteria see sales or customer data of another cafeteria? (Security & Isolation)

Ans (EN): Strict multi-tenancy isolation is enforced at the database level. Every query and session token is scoped with organizationId. Only Super Admin has cross-tenant platform visibility.

Ans (ML): Oru cafeteria-kku mattulla cafeteria-yude sales-o data-yo kanikilla. Strict tenant isolation undu. Super Admin-u mathrame ellaam kanano.

Q4: How are customer refunds processed and tracked by Super Admin?

Ans (EN): When a cashier initiates a customer refund, the balance is credited back to the customer wallet. The Super Admin dashboard tracks this under Customer Refunds and computes $\text{Net Revenue} = \text{Gross Purchases} - \text{Refunds}$.

Ans (ML): Oru customer-kku refund nalkumpol panam card-ilekku thirike credit aakunnu. Super Admin dashboard-il $\text{Net Revenue} = \text{Sales} - \text{Refunds}$ aayi calculate cheyyunnu.

Q5: Can Super Admin set custom pricing or discounts for a specific VIP cafeteria?

Ans (EN): Yes. Super Admin can create Organization Overrides attached to a specific organizationId, granting custom pricing, extended billing, or elevated limits without changing public tiers.

Ans (ML): Athe, Super Admin-u oru prathyeka cafeteria-kku mathramayi custom plan override, discount, card limit enniva nalkan kazhiyum.

Q6: What prevents card balance tampering, cloning, or double-spending?

Ans (EN): Balances are not stored on plain NFC chips. They are managed on the secure cloud ledger. Tapping verifies encrypted UID and session nonce in real time, preventing cloning.

Ans (ML): Balance card-il alla, secure cloud ledger-il aanu sookshikkunnath. Card tap cheyyumpol server verify cheyyunnathukondu double-spending nadakilla.

Q7: How does client-side PDF export work without placing CPU load on the server?

Ans (EN): The PDF generation uses client-side jsPDF in the browser memory. It formats tables and charts vectorially without requiring backend headless browsers or rendering microservices.

Ans (ML): PDF generation poornamayi client browser-il (jsPDF) aanu nadakkunnath. Server bandwidth-o CPU load-o aavashyamilla.

5. Technical Stack & Implementation Architecture

- Frontend Core: React 19, TypeScript, Tailwind CSS, Lucide Icons, Vite Fast Bundler
- PDF Vector Engine: Client-Side jsPDF Vector Engine with Dual-Mode (In-Browser Blob Preview & File Download)
- Backend Architecture: Node.js, Express, TypeScript, Prisma ORM, PostgreSQL Database
- Security & Tenant Isolation: Role-Based Access Control (RBAC), JWT Authentication, Strict Organization Scoping
